

Parking & security management. One system. Fully scalable.

When you're making a decision about a security and parking management solution, you don't want to compromise on features. You want a single solution that can give you what you need today with the option to grow with you as your needs and demands change.

At OPS-COM, we've developed our system and modules with that in mind. We're unique in our industry, offering an integration-free experience with more options and features than the competition.

Everything you need when you need it. No integrations.

- ✓ Permits, violations, and incidents managed in one
- ✓ License plate recognition technology included
- ✓ Built in mobile parking payment options
- ✓ Online 24/7 customer access to applications and appeals
- ✓ Option for virtual permits or print your own hantags
- ✓ Handheld patrol units with LPR & GPS mapping and real-time data
- ✓ Customizable permit types, lot definition, waiting lists, & pricing
- ✓ Comprehensive reporting and case tracking
- ✓ Full dispatch logging, alarm, and alert processes
- ✓ Complete customer database with email notifications
- ✓ Exceptional customer service with choice of service package
- ✓ Technical support for training, customizations, and integrations
- ✓ Manage locker assignments
- ✓ Easy payment provider integration

Stay in control with a simplified parking and security system.
