

4.6.170627 - Web Maintenance

OperationsCommander has released this to client preview environments on 06/27/17 and to client production environments on 07/10/17.

What's included?

- [New - Permissions Added](#)
- [Updated - Settings Migration](#)
- [Updated - Payment View](#)

New - Permissions Added

The following permissions have changed to further limit access to sensitive areas:

- The permission to Merge Vehicles and Users have now been separated from the others. You will need the 'Manage Duplicates' permission to have that functionality.
- OPS # / Search has been isolated as a permission from Incident Admin
- The permission to 'reopen own incidents' has been separated from Incident Admin permissions

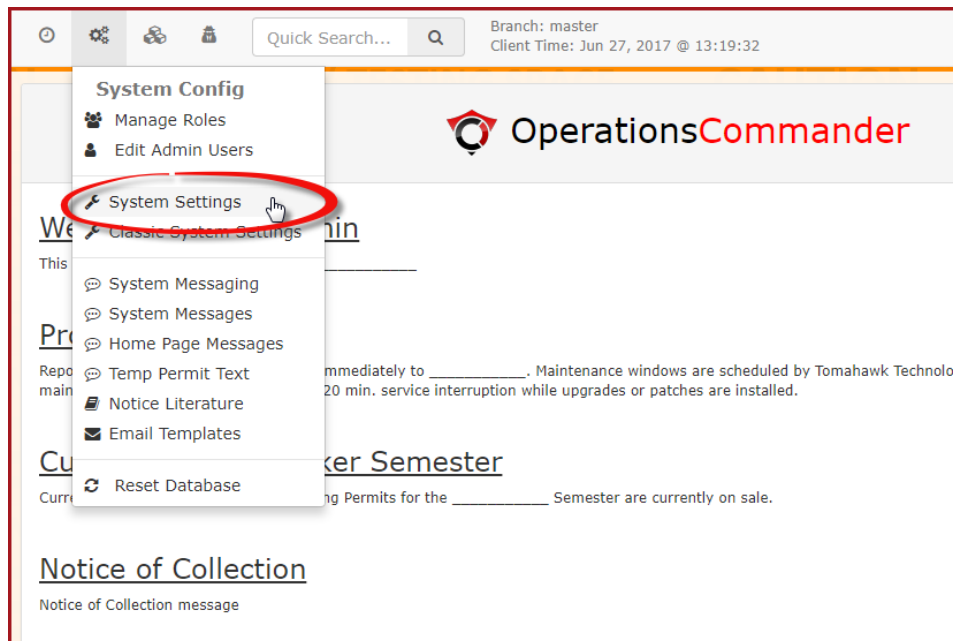

Updated - Settings Migration

The following setting has been migrated to the new settings editor. You can view and edit this setting now:

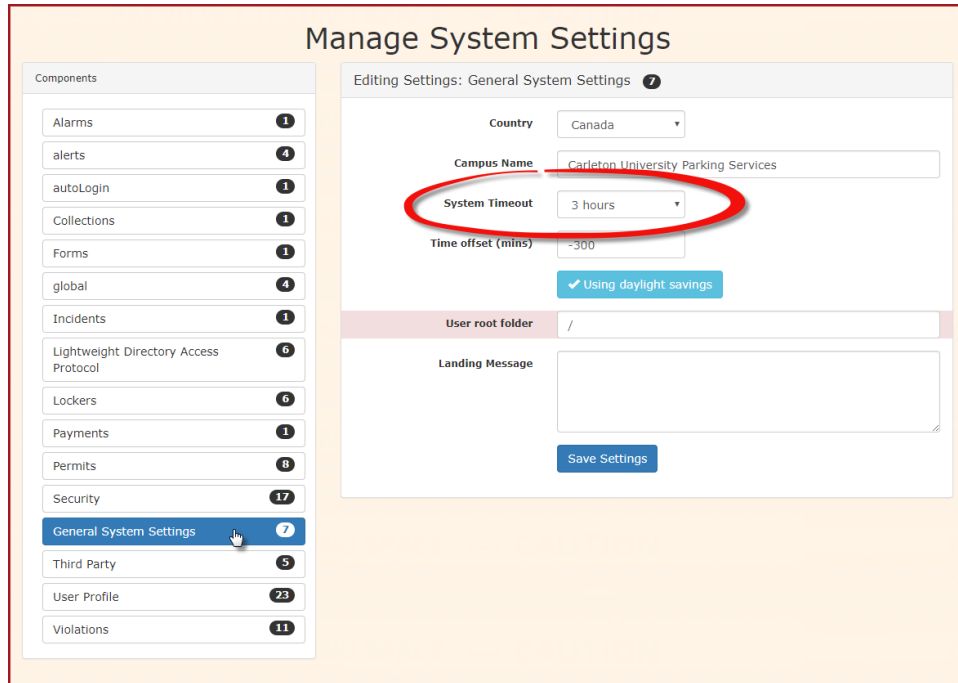

- System Timeout - This controls the time limit before Admin users will be logged out after X hours of inactivity.

To access this setting:

1. Hover over the System Config menu. From the drop-down list click on System Settings

- From the Manage System Settings page click on General System Settings to display the settings which include System Time Out. You may select 1 Hour, 2 Hours, 3 Hours or 6 Hours.

Updated - Payment View

An update to the mobile-enabled user side Payment View has been included. You now can view payment details by clicking on the payment in the User History. See the screenshot below:
