

6.7.231551 - Android Maintenance

The **OperationsCommander** team is pleased to announce the release of our improved handheld software. OPS-COM for Android is better than ever. Please review the new functionality and fixes implemented in this release.

New

1. Details about past violations can now be displayed, including, Unpaid, Paid and Warning counts shown on plate search.

2. Users can now change license plate reads that have been previously updated manually.

Updated

1. OC-2862 - The wildcard searching for manual plate search has been reinstated.

Fixed

1. Fixed - No longer creates a duplicate entry at the top of the list when selecting past LPR items.
