

6.11.290813 - Android Maintenance

The **OperationsCommander** team is pleased to announce the release of our improved handheld software on 29 Nov 2018. OPS-COM for Android is better than ever. Please review the new functionality and fixes implemented in this release.

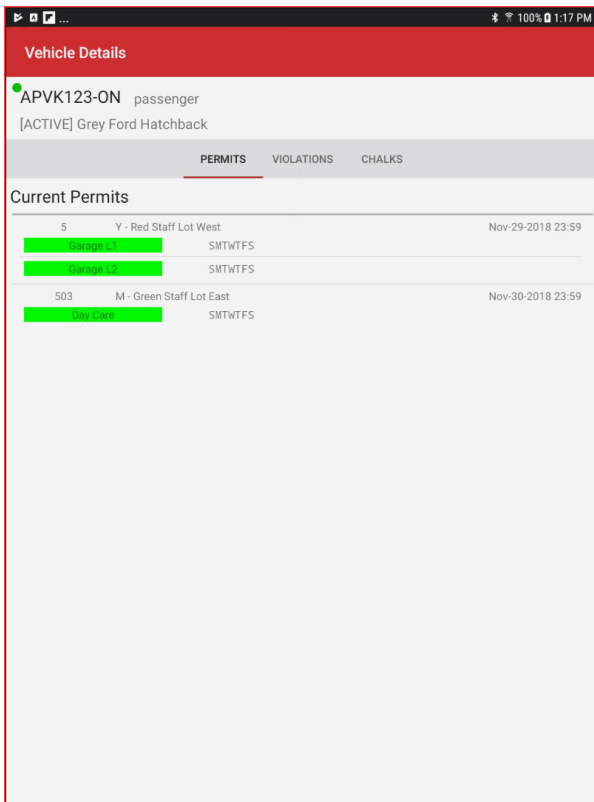

New

Support for Violation Summary

- Select Details button after searching a plate to view Permits, Violation History, Chalking History
- Include alarm on LPR scan

This new functionality will now allow the patrol officer to see much more detail about the vehicle being queried. The Details section is now in a tab format.

Alarms on LPR Scans:

Alarms that have been set of vehicles will now show in LPR scanning.

The screenshot shows the PL8-RDR LPR Scanning interface. At the top, it indicates 'LPR Proxy Connected' and 'Status'. Below this, there are dropdown menus for 'Any Parking Group' and 'Any Zone'. A video feed shows a vehicle with license plate BRMP924-CANON, timestamped '2018 14:56:44'. Below the video, the license plate 'BRMP924' is displayed with a red 'OFF' button. A green checkmark and the text 'BRMP924-ON - passenger' are shown, along with a red alarm icon. Below this, it says 'Database query result'. At the bottom, there is a table titled 'RECENT LPR RESULTS' with 14 entries. The entry for BRMP924-CANON is highlighted in red, and the license plate 'BRMP924' is circled in red.

RECENT LPR RESULTS				14
BVPE365-CANON	BVPE365	VEGAI	86.0	
BTZV831-CANON	BTZV831	VEGAI	84.0
