

## 6.5.021229 - Android Maintenance

The **OperationsCommander** team is pleased to announce the release of our improved handheld software on 01 May 2018. OPS-COM for Android is better than ever. Please review the new functionality and fixes implemented in this release.

### New

1. OC-2549 - The time and date stamp has been added to all upload images.
2. The app version details will now be pushed to the OPS-COM server. This will allow our support agents to more easily determine the version of software you are running.
3. OC-2405 - The Virtual chalking pick list selection for Location, Province and Plate Type will now be saved and used as future defaults when chalking the next vehicle.
